

Entering Participant Outcome Data

1 Nov 2013 - ES

Based on what was specified in **Site Definitions**, each participant will have one or more outcome instruments available for tracking and data entry. From the **Home Form**, click on **Parent Outcomes** and choose the desired instrument from the drop-down menu.

The screenshot shows the 'Parent Outcomes History' interface. At the top, there is a navigation bar with tabs: Home, Screening, Assessment, Intake, Base/Follow, Referrals, and Parent Outcomes. Below this is a secondary navigation bar with tabs: History, Service, Monthly Log, Home Visits, IFSP, Medical Visits, and Termination. The main area features a dropdown menu for 'Instrument' currently set to 'SAFETY (MD)'. A list of instruments is displayed: ACOG-DV, CES-D, Edinburgh, HFPI, Life Skills Progression, and SAFETY (MD). To the left of the instrument list is a 'Time Point' dropdown menu with options: 1 month, 6 months, and 12 months. To the right of the instrument list is a text box explaining the dropdown and an 'Add New' button.

The schedules specified in the **Outcome Instrument Information** forms will create templates of the administration schedules, from which a specific schedule of dates will be built for each participant.

Example – Edinburgh Postpartum Depression Scale (specific form)

The screenshot shows the 'Parent Outcomes History' interface with the 'Instrument' dropdown set to 'Edinburgh'. Below the dropdown is a table with columns: Time Point, Repeat, Min Due, Max Due, Completed, and Staff. The table contains three rows of data. To the right of the table is a text box explaining the dropdown and an 'Add New' button.

Time Point	Repeat	Min Due	Max Due	Completed	Staff
prenatal: Third Trimester		10/7/1899	12:00:00 AM		
Baseline		8/7/2003	9/7/2003	8/7/2003	101
1 month		8/7/2003	10/7/2003		

Selecting the one month interval and clicking “Add New” brings up the specific data entry form for the Edinburgh.

Outcome- Edinburgh

Date of Screen: 9/10/2003

Schedule of Screen: 1 month

Check if repeat administration

Staff who administered: 101

Edinburgh Score: 10

Flag on item 10

Possible Depression: True

Suicide Risk: False

Notes

Possible Depression

Add Referral Date of Referral: 9/15/2003

Because the participant scored 10, PIMS indicates “possible depression”. A referral record is then created and linked to the outcome record.

Referral Date: 9/15/2003 Referral Origin: Edinburgh_Depression

Referral Service Type: Counseling and Support Services

Other Specify:

Referral Agency Type: Non-Hospital Collaborating Agency

Referral Agency: Depression After Delivery

Arrangement: Referral Service Information: Notes:

Who was referred: Mother of child

Child:

Service received? Yes

If Service Was Received

Date started: 9/15/2003

Action taken: immediate phone screening and appointment

If Service Was Not Received

Reason not received:

Other Specify:

Action taken:

The outcome record now shows the results of the referral.

Outcome- Edinburgh

Date of Screen: 9/10/2003

Schedule of Screen: 1 month

Check if repeat administration

Staff who administered: 101

Edinburgh Score: 10

Flag on item 10

Possible Depression: True

Suicide Risk: False

Notes:

Possible Depression

Add Referral: Date of Referral: 9/15/2003

Date FSW checked results of referral: 147

Status of Referral: Referral received for Counseling and Support Services on 9/15/2003; Action Taken: immediate phone
